

**SM5651/SM5652**

**Low Pressure, Constant Current DIP
Low Pressure, Constant Voltage DIP**

- **Low Pressure Transducer Fully Temperature Compensated and Calibrated
Dual-In-Line Package**

DESCRIPTION

The **SM5650** Series of OEM pressure sensors are fully calibrated, temperature compensated low-pressure sensors in dual in-line packages for printed circuit board mounting. These sensors offer improved performance as well as the option for either constant current or constant voltage excitation. Higher pressure ranges are also available (See **SM5611/SM5612**

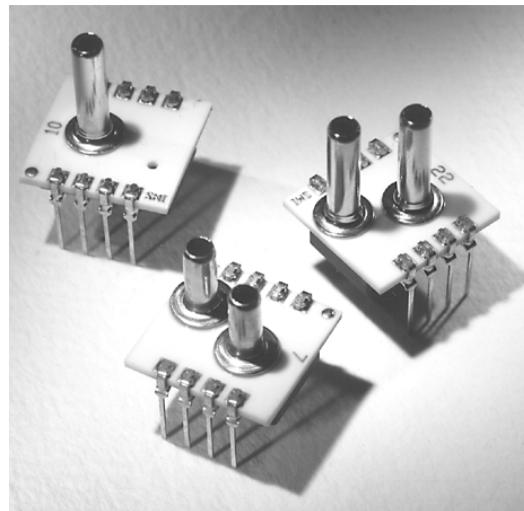

Datasheet), resulting in the broadest selection of standard pressure ranges in the industry.

The **SM5600** Series pressure sensors are constructed by attaching a highly stable piezoresistive pressure sensor chip to a ceramic substrate. Thick film resistors on the ceramic are laser trimmed during manufacturing to provide zero offset calibration, temperature compensation for zero offset, and temperature compensation for sensitivity. In the Model **SM5651**, an additional resistor is trimmed to normalize the output of an external differential amplifier to provide span calibration when the sensor is driven by a constant current supply. In the Model **SM5652**, a constant voltage supply can be used and the normalized output span of each sensor can then be easily amplified.

The model **SM5651** is designed for constant current excitation.

The model **SM5652** is designed for constant voltage excitation.

Various electrical pin and pressure port configurations are available for flexibility in matching this product to specific applications.

Notes:

- Positive Pressure is defined as entry on the bottom side of the die; gain, during factory calibration, is set using negative pressure
- For the SM5652, 0.15 PSI range, span is 23.75 (min) to 26.25 (max).
- Measured over a temperature range of 0 to 60 °C.
- For 0.15 PSI, TC Span=±2.0%FS; TC Offset=±2.0%FS; For 0.3 PSI, TC Span==±0.75%FS
- For 0.30 PSI, Hysteresis=±0.45%FS;
- For 0.15 PSI, Hysteresis=±0.65%FS
- Best fit straight line; measured from top-side of die
- For 0.30 PSI, Linearity=±0.5%FS;
- For 0.15 PSI, Linearity=±2.5%FS
- Sensitivity matching relates to part-to-part matching
- For 0.15 PSI, Sensitivity Matching=5.0%FS
