

SS0102

CLOCK WITH THERMOMETER -50°C(-58°F) ~ +70°C(+158°F)

Features:

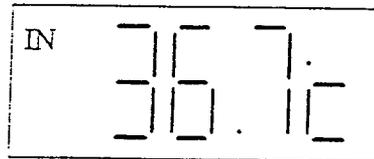

1. 1.5 Volts battery power supply
2. 12 HOUR clock function (Hour-Minute Display)
3. High and Low temperature alarms
4. Temperature sensing rate (2 sec. /10 sec.)
5. Max-min record of two areas and can be reset
6. Temperature data hold
7. Measure range from -50°C(-58°F) to +70°C(158°F)

- Maximum and Minimum OUTSIDE temperatures can be shown in the same way.
- INSIDE and OUTSIDE temperature is selected by switching S_3
For INSIDE, $S_3 = \text{OPEN}(V_{SS1})$

For OUTSIDE, $S_3 = V_{DD}$

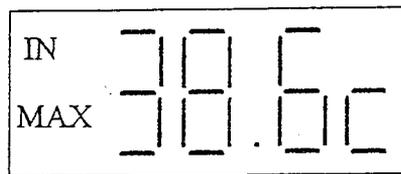

- The max-min record can be clear by pushing S_2 when display shows max or min as above.
- Function of Temperature Mode ($K_1, K_2 = \text{OPEN}(V_{SS1})$)

Terminal	Level	Function
K_4	V_{DD} $\text{OPEN}(V_{SS1})$	$^{\circ}\text{F}$ is chosen $^{\circ}\text{C}$ is chosen
S_1	V_{DD}	View max-min temp.
S_2	V_{DD}	Clear max-min temp.
S_3	V_{DD} $\text{OPEN}(V_{SS1})$	OUTSIDE temp. INSIDE temp.
S_4	V_{DD} $\text{OPEN}(V_{SS1})$	2 sec. sampling 10 sec. sampling

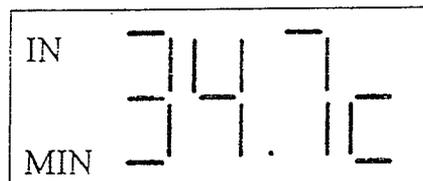

3.2 Temperature Mode ($K_1, K_2 = \text{OPEN}(V_{SS1})$)

- This mode is activated by keeping K_1 and K_2 OPEN(V_{SS1}).
- User can choose between °C and °F by switching K_2 .
For °F, $K_4 = V_{DD}$.
For °C, $K_4 = \text{OPEN}(V_{SS1})$.
- Sampling rate can choose by switching S_4 .
For 2 sec. sampling, $S_2 = V_{DD}$.
For 10 sec. sampling, $S_2 = \text{OPEN}(V_{SS1})$.
- Sampling and hold function is activated by pushing S_2 once. This is indicated by a flashing °C or °F flag. To return to temperature mode, just push S_2 again.
- Push S_1 at temperature mode, the display will show (Assume INSIDE)

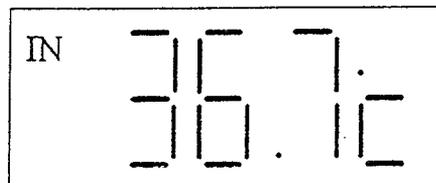

It means the highest (Max.) temperature record is 38.6°C.

- Push S_1 , again, the display will show

It means the lowest (Min.) temperature record is 34.7°C.

- If push S_1 once more, it will back to the normal, and the display will show

It means the current surrounding temperature is 36.7°C.

I. General Description

SS0102 is a CMOS integrated circuit that has a temperature measuring function and a clock function. Temperature ranging from $-50^{\circ}\text{C}(-58^{\circ}\text{F})$ to $+70^{\circ}\text{C}(+158^{\circ}\text{F})$ is detected by employing a thermistor as sensor. Measured temperature is displayed on a $3\frac{1}{2}$ digits liquid crystal display. It operates at 1.5V with a very low power consumption and interfaces with and LCD. Clock is display in 12-Hour format.

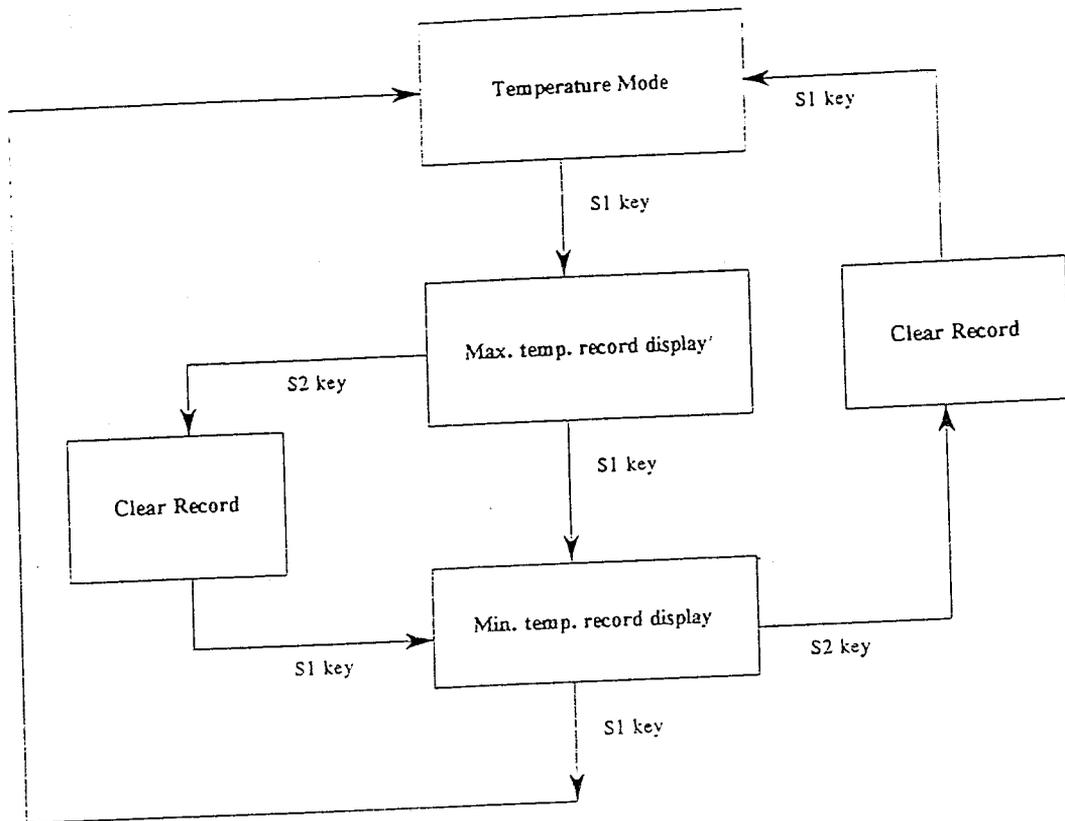

II. Features

- Measurement of temperature by thermistor. (Ishizuka 103AT-2B, 413ET-1 available from VSL)
- $3\frac{1}{2}$ Digits LCD with MAX, MIN, AL, $^{\circ}\text{C}$, $^{\circ}\text{F}$, IN, OUT indicators. (LCD VCD 0101-1)
- Measurement range : $-50^{\circ}\text{C}(-58^{\circ}\text{F})$ to $+70^{\circ}\text{C}(+158^{\circ}\text{F})$

Resolution	0.1° (-19.9° to 70°)	$^{\circ}$ (Otherwise)
Accuracy	about 1° to 2°C	

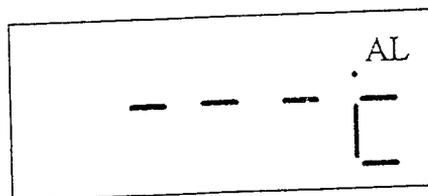

- High and Low temperature alarms set by $1^{\circ}\text{C}(1^{\circ}\text{F})$.
- 12 HOUR clock function. (Hour-Minute Display)
- Temperature sensing rate (2 sec./ 10 sec.) selectable.
- Temperature data hold.
- Temperature alarm function that allows the user to select either a high alarm or low alarm.
- Maximum and minimum temperature of both inside and outside environments can be recorded and cleared.
- Rate : 10 mW when no temperature is being measured.
- 1.5 V battery operation.

max-min temperature record can be displayed or cleared by the following sequence.

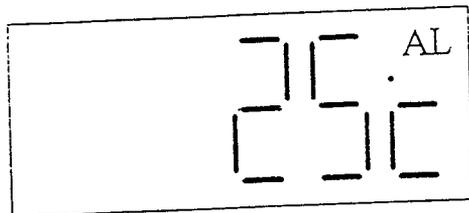

3.3 Temperature Alarm Setting Mode ($K_2 = V_{DD}$)

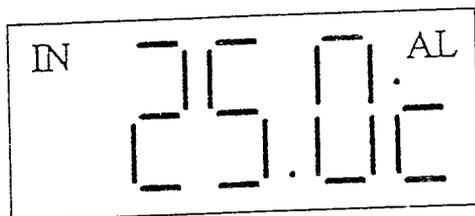

- This mode is selected by connecting K_2 to V_{DD} .
- For high alarm, $K_3 = V_{DD}$.
- For low alarm, $K_3 = OPEN(V_{SS1})$.
- When K_2 is switch to V_{DD} and the display will show

- For example if the user wants to be alarmed when measured temperature is below 25°C. The user can select Low temperature alarm by the following steps.
 1. Press S_2 until 25°C is reached.

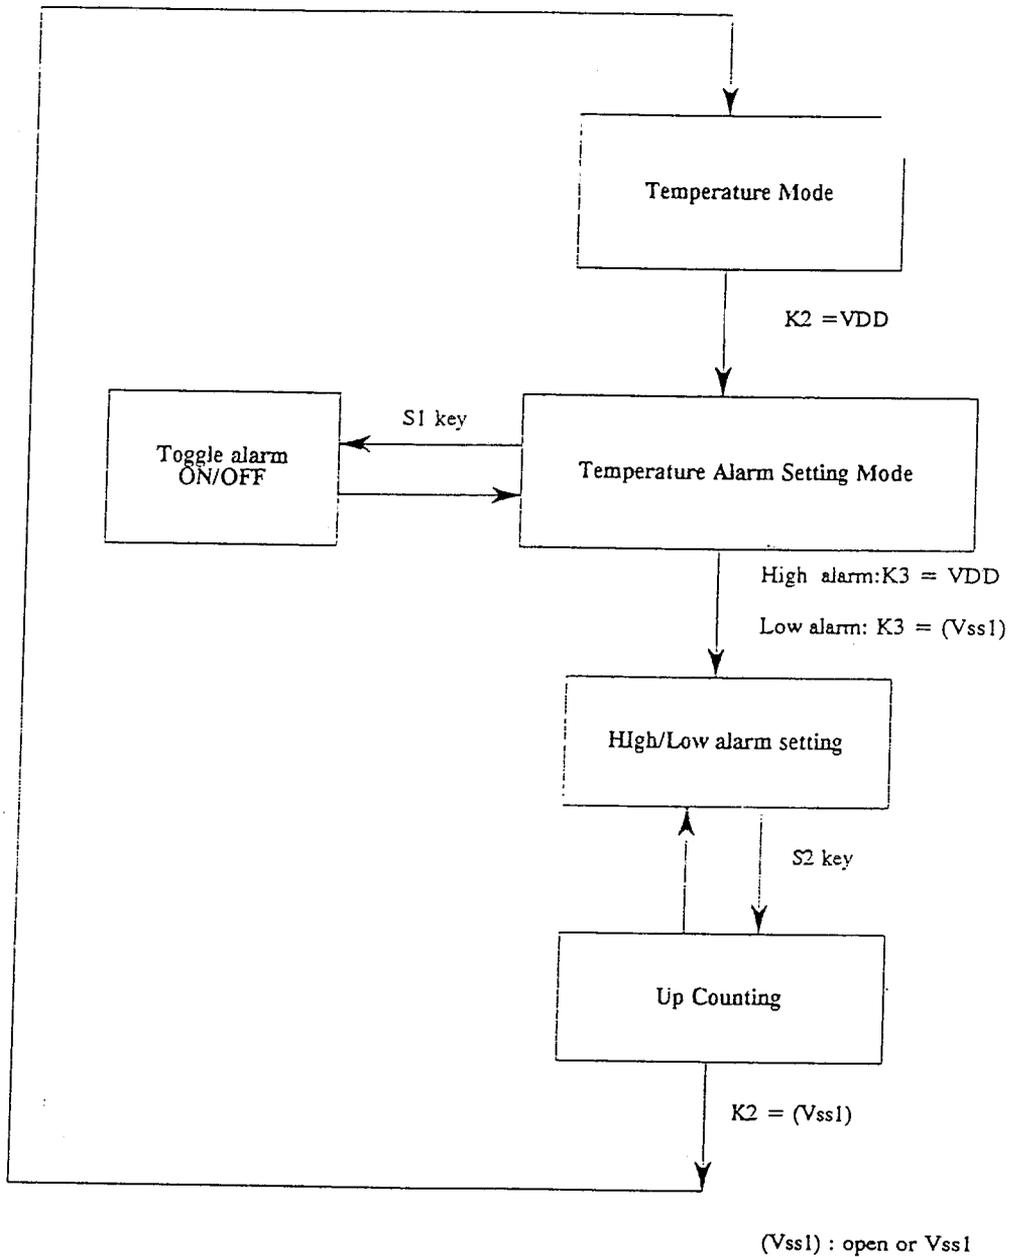

2. Select Low temperature alarm by connecting K_3 to OPEN(V_{SS1}).
3. Enable or disable of temperature alarm is toggled by pushing S_1 . When it is enable, "AL" flag will appear.
4. Switch K_2 to temperature mode.

- Function of Temperature Alarm Setting Mode ($K_2 = V_{DD}$)

Terminal	Level	Function
K_3	V_{DD}	High alarm
	OPEN(V_{SS1})	Low alarm
S_1	V_{DD}	Toggle alarm On/Off
S_2	V_{DD}	High /Low Temp. alarm set

- The temperature alarm value can be set by the following sequence.

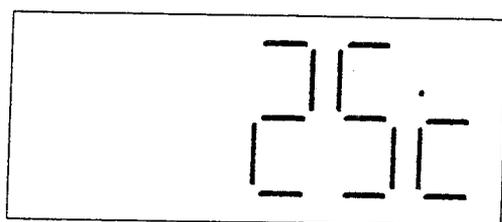

IV. Alarm Operation

When temperature exceeds the High temperature alarm value (Max) or temperature drops below the Low temperature value (Min), alarm sound is output from BD OUT for 5 seconds. The alarm sound composes of 5 beeps of one second duration within one minutes.

During the alarm sounding, if either S_1 or S_2 is pushed, the alarm sound will be stopped. Otherwise, the 5 beeps / minute buzzer sound will continue. Even then, the alarm cannot be disabled, the alarm will activate when it crosses the alarm temperature.

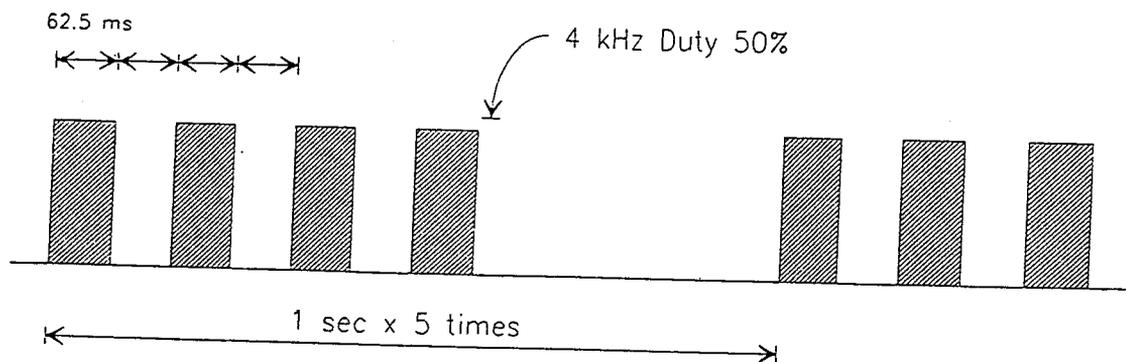

If the user wants to disable alarm in temperature mode, the user must go to temperature alarm mode and press S_1 once to remove 'AL' flag -- (Cancel alarm function). The display shows as follows.

M_1 change to V_{DD} when temperature exceed Max or temperature drops below Min. It keeps at V_{DD} unless

- (1) temperature drops below the High temperature value,
- (2) temperature rises above the Low temperature value or
- (3) either S_1 or S_2 is pushed during the alarm sounding.

The alarm output signal is shown as follows.

V. Function of Terminals

Terminal	Level	Function
K ₄	OPEN(V _{SS1}) = °C / Colon Blink V _{DD} = °F / Colon Not Blink	°C/°F and Colon Blinking terminal
*K ₃	OPEN(V _{SS1}) = Low alarm V _{DD} = High alarm	High/Low Temperature Alarm switching terminal
K ₂	V _{DD}	Temperature Alarm Setting Mode
K ₁	V _{DD}	Clock Mode
K ₁ & K ₂	OPEN(V _{SS1})	Temperature Mode
S ₄	OPEN(V _{SS1}) = 10 sec. sampling V _{DD} = 2 sec. sampling	Sampling data adjusting terminal
S ₃	OPEN(V _{SS1}) = INSIDE V _{DD} = OUTSIDE	INSIDE/OUTSIDE temperature switching terminal
S ₂	V _{DD}	MN set, temp alarm set, clear max-min, sample and hold
S ₁	V _{DD}	HR set, toggle alarm on/off, view max-min

*Only one temperature alarm is available, user can select it as a low or high alarm.
