GALILEO PLG8

Gas control panel

DESCRIPTION

GALILEO PLG8 is a microprocessor based control unit, 8 detection zones upgradeable to 16, for toxic and /or explosive gas detection, housed in a metallic cabinet complete with 12Vdc 2A power supply or 19" rack with separate power supply which has to be ordered separately.

At the core of the control panel there is an 8 bit microprocessor.

The PLG8 is a built-in 8 analog 4-20 mA zones control unit that can be extended to 16 by using an on-board 8 zones expander module, which can be easily connected directly in the control unit.

With respect to the controllable outputs, the control panel is equipped with 4 relay outputs, which are freely programmable via the appropriate menu.

A RS232 port allowing the connection to remote programming and control systems and a Centronics' parallel printer port are also available.

The PLG8 control unit can be configured for a different kind of gas detectors employed to detect, in an atmosphere mainly composed of air, either the presence of flammable compounds, the concentration in terms of percentage of the Lower Explosion Level (%LEL), and

toxic compounds, in a concentration expressed in ppm (parts per million) or, in particular for oxygen, its deficiency detection.

The GALILEO PLG8 is also provided with events log: the number of events that the control unit can store is up to 800.

The system programming can be performed by the present back lit LCD display and the keypad on front of the control unit or by Personal Computer with the appropriate software. The LCD display provides the user with a visual display of all operator instructions and reports. The RS232 port allows connection to remote programming and control systems (Personal Computer) that during the normal operation, provides the facility of copying, storing and viewing the programming data and event log from an on-line PLG8 control unit.

The information transmitted to the computer is in SIA format that provides highly detailed information on each alarm or events, but the PLG8 control units can be customized with other kind of formats.

The PLG8 box version control unit, allows the connection of a 12 VDC additional battery to ensure its normally working when the main power supply fails.

GALILEO PLG 8-16

Housing:	19" - 3U Rack Box Dim.:440x420x140 mm	Display	Box version: 220 V ac Back lit LCD 16c. on 2 rows
Microprocessor	8 bit, 8 Mhz	LED indications:	Main power supply
Eeprom	1 x 128 Kbyte		All. 1, All. 2, All. 3 and fault
Non volatile memory	1 x 128 Kbyte		
Inputs:	8 x 4-20 mA analog inputs + 8 with optional module	Events log capability: Stand by battery	up to 800 events buffered
Outputs:	4 programmable relay outputs	capability:	12V/15Ah only box version (sealed lead acid battery)
Serial port (PC):	1 x RS232		
Aux serial port:	1 x RS485 (with PLG8/SER module)	Operating temperature	0- 40 °C
Parallel port:	CENTRONIC	Relative humidity	15-85% non condensing
Power supply:	Rack Vers.: 12 V cc		

COMPATIBLE WITH THE FOLLOWING SENSITRON DETECTORS

<u>"ANALOG"</u> LIFESAVER SERIE	ANALOG Detectors, CATALYTIC sensor, with 4 - 20 mA proportional output. Power supply 11-28 VCC.
<u>"SMART and SMART 2</u> CATALYTIC SENSITRON SERIE	Microprocessor Detectors, catalytic sensor, with three thresholds open-collectors alarm output, and 4 - 20 mA proportional output. Power supply 11-27.6 VDC.
<u>"SMART and SMART 2</u> ELECTROCHEMICAL. CELL" SENSITRON SERIE	Microprocessor Detectors, ELECTROCHEMICAL CELL sensor, with three thresholds open-collectors alarm output, and 4 - 20 mA proportional output. Power supply 11-27.6 VDC.

PART NUMBERS

ST.G/PLG8B	GALILEO PLG control unit.: 8 zones triple threshold microprocessor control panel. Accepts 4-20 mA analog signals. LCD 2x16 characters. metal cabinet. 12 V, 2 A enclosed Power Supply. Expandable to 16 zones using 1 ST.G/IN8 and 1 ST.PLG/SER.
ST.G/PLG8R	As above but in 19" 6U rack. 12 Vdc Power supply is required.
ST.G/PLGSER	Expander serial module for ST.G/PLG8B(R).
ST.G/IN8	8 remote inputs card for the GALILEO MULTISCAN and PLG8 control panel.
ST.SW/M-GA	"SECURNET" Maps Graphics software for GALILEO PLG8 and MTS installations. Windows 3.1 or '95 is requested. Supplied with dongle. Fully programmable by customer, can accept graphics files built with other software. Trend and Bargraph performances of the Control Units detectors input.

Due to **Sensitron's** commitment to research, design and product improvement specifications are subject to change without notice.
